

EDUCATION

Mahendra College of Engineering
Bachelor of Engineering in Computer Science; CGPA: 8.6

Salem, Tamilnadu
September 2022 - May 2026

SKILLS SUMMARY

- Languages: Python, Java, JavaScript, HTML, CSS, SQL, JSON
- Frameworks: React, Node.js, Tailwind CSS, Vite
- Tools: Git/GitHub, Vercel, Postman, Excel, PowerPoint
- Platforms: GitHub Pages, Chrome DevTools, Jupyter Notebook, Visual Studio Code
- AI/ML Tools: NLP, OCR, Computer Vision, RAG, LLM
- Soft Skills: Complex Problem Solving, Technical Innovation, Rapid Technology Adoption, Excellent communication

WORK EXPERIENCE

Web Developer Intern | Infosys Springboard | [LINK](#) November 24 - January 25

- Led UI design initiatives for team-based web application project, creating intuitive and responsive user interfaces that improved user experience.
- Successfully integrated multiple APIs, ensuring seamless data flow and real-time functionality across the full-stack web application.
- Collaborated effectively with development team to deliver a production-ready web application, demonstrating strong teamwork and communication skills.

AI/Cloud Intern | IBM SkillsBuild | [LINK](#) July 25 - August 25

- Gained practical experience and leveraged IBM Cloud Platform in key areas of Artificial Intelligence and Cloud computing.
- Developed an end-to-end Retrieval-Augmented Generation (RAG) model to automate and streamline the college admission process, leveraging IBM Cloud services and AI/ML techniques.
- Applied advanced concepts in information retrieval, natural language processing (NLP), and large language models for efficient question-answering and data-driven decision support in admissions.

PROJECTS

Check Analysis System | [LINK](#) January 25 - February 2025

- Developed financial data extraction processing account numbers, routing details, IFSC/MICR codes, and transaction validation with automated banking integration.
- Built React 18 SPA with JavaScript ES6+, Tailwind CSS, featuring lazy loading, code splitting, and PWA capabilities achieving sub-2 second load times.
- Implemented end-to-end encryption for sensitive financial data transmission and storage.

Resume Analysis Tool | [LINK](#) May 25 - June 2025

- Built scalable web application using React 18 and Vite with TextRazor NLP API integration for intelligent resume analysis and keyword optimization.
- Built semantic matching algorithms using TextRazor's entity extraction to align resume content with job descriptions.
- Designed intuitive dashboard with drag-and-drop file upload, progress tracking, and instant feedback mechanisms.

Meal Planning Application | [LINK](#) July 25 - August 2025

- Architected the application using React, TypeScript, Vite, and Tailwind CSS, ensuring a modern, scalable, and visually appealing user interface that provides seamless interaction across devices and browsers.
- Integrated advanced AI models for dynamic recipe recommendation, real-time ingredient management, and dietary restriction filtering, significantly enhancing application usability and user satisfaction.
- Successfully deployed and optimized the solution on Vercel, leveraging CI/CD practices to maintain production reliability, high performance, and rapid update cycles for ongoing improvements and scalability.

CERTIFICATES

Introduction to Front-End Development (Meta) | [CERTIFICATE](#)

- Familiarity with UI Frameworks Developed skills in using modern UI frameworks like Bootstrap and React, enhancing the ability to create interactive and user-friendly web applications.
- Hands-On Project Experience Completed a final project that involved creating and editing a responsive webpage using HTML and Bootstrap, demonstrating practical application of learned skills.
- Practiced responsive design and accessibility techniques to ensure cross-browser compatibility and optimal user experiences.
